

# PELICAN 9410L FLASHLIGHT

06/18/2024

DESIGNED IN

U S A

SINCE 1976

## TECHNICAL BULLETIN

### Description of Issue

Pelican has received a report that the 9410L flashlight may turn off if used within 8-12 inches of an active radio/walkie talkie (e.g., Motorola APX6000XE 800MHz portable radio). The flashlight can be turned back on immediately.

All 9410L lights (all colors) manufactured since 2010 are affected and may turn off when used concurrently within 8-12 inches of an active radio/walkie talkie.

### Prevention

To prevent the issue, avoid using the 9410L flashlight within 8-12 inches of an active radio/walkie talkie.

### Correction

If you encounter this issue and it is safe to do so, move the radio away from the 9410L flashlight and turn the flashlight back on.

### Questions?
